

## Help spread the word

Tools and ideas for reaching local and provincial audiences to amplify OurCare's call for change

### Thank you for continuing to support OurCare!

- Ways you can amplify OurCare recommendations and the Standard
- Key messages
- How to make a pitch or a post

## We need your help to amplify OurCare's call for change.

We want you to reach out to your MLAs/MPPs, MP and local councillors, as well as regional health authorities.

But we also want you to think about the networks you belong to: book clubs, congregations, service clubs, professional associations, neighbourhood groups.

### You can help to amplify OurCare online and off.

- Ask for a meeting with local health leaders, policy makers and politicians
- Make a presentation to a local organization like the YMCA or Community Foundation.

- Post about your experience on Facebook, X and LinkedIn
- Write an op-ed
- Reach out to your local radio station.

### We have materials to help!

- Press releases
- Fact sheets
- Generic presentations
- Talking points

#### The Problem

Primary care is the front door to our health system, but for too many people living in Canada, that front door is closed.

#### One in five

Canadians do not have access to primary care services

Primary care providers are facing **burnout** and **administrative burden** impacting their ability to deliver high-quality care.

With an increasing number of family doctors retiring and fewer medical students choosing to specialize in family medicine, coupled with continued population growth and aging, access to a family physician will only get worse.

Patients are not able to access the care that they need when they need it, with more patients than ever turning to **seek care in Emergency Departments**, **travelling long distances** or **forgoing care altogether** resulting in negative downstream effects of the health system.

### So what's so special about OurCare?

- Largest ever pan-Canadian conversation about primary care —
  based on 9,000 survey responses and 10,000 hours of volunteer time
- Everything starts with primary care. Strengthening primary care is the best way to improve health and reduce pressure on the health system.
- Everyone should be able to access on-going, high quality primary care and be served by a primary care team.

### **Key Themes Across Jurisdictions**

**Resolve** the attachment crisis

**Enable** patient access to health records

**Grow** the primary care workforce

Improve accountability

**Expand** team-based primary care

**Expand** virtual care

**Bring** a strong equity focus

**Expand** primary care coverage

OurCare Goal: Raise the standard for primary care across Canada

Our Care believes that every person in Canada must be connected to a primary care team.

### Introducing the OurCare Standard

The OurCare Standard distills several hundred recommendations into six guarantees we want governments across Canada to adopt.

**1.** Everyone has a relationship with a primary care clinician who works with other health professionals in a publicly funded team.

**2.** Everyone receives ongoing care from their primary care team and can access them in a timely way.

**4.** Everyone can access their health record online and share it with their clinicians.

**3.** Everyone's primary care team is connected to community and social services that together support their physical, mental and social well-being.

**5.** Everyone receives culturally safe care that meets their needs from clinicians that represent the diversity of the communities they serve.

**6.** Everyone receives care from a primary care system that is accountable to the communities it serves.

#### **Ways to Achieve the Standard**

Enhance curriculum, professional development offerings, and 01 Guarantee access to primary care for 05 practice standards to ensure all primary care professionals are trained to provide trauma-informed, anti-discriminatory, everyone living in Canada culturally safe, and gender-affirming care 02 06 Reduce barriers to practice for Increase funding for primary care internationally trained clinicians Legislate requirements for electronic Ensure consistent funding and use of 03 health record interoperability and language interpretation services for patient access to their health data language-concordant care Scale up training capacity to increase the 08 Establish systems for patient and number of health professionals graduating with public oversight of primary care. interest and competency in primary care and optimize interprofessional collaboration

# Investing in OurCare recommendations is a win for government

**Investing in primary care will:** 

Reduce strain on the health care system.

Ensure everyone has access to the care they need.

Ensure everyone can thrive physically, mentally and socially.

#### **How to talk about OurCare**

- Positive. Solutions-focussed. Common sense.
- "We all want to make primary care better we can by adopting the OurCare Standard and investing in primary care."
- This is what people across Canada want strengthening primary care is one thing that everyone agrees on.

#### How to NOT to talk about OurCare

- Simplistic. Judgemental. Opinionated.
- Government is the problem.
- The solution is easy.
- Doctors and nurses need to be made to do more.

### Tips

Use personal and professional connections

Stick to time

Be appreciative

Learn about your audience

Write a cheat sheet

## Share your wins! (And your losses)

We want to hear how about your experiences talking about OurCare
